Playground Paint is also suitable for use on Interior wooden surfaces and floors.

### CHARACTERISTICS:

- Water based and non-toxic
- No lead or heavy metals
- Hard wearing
- Fungicidal protection
- UV resistant
- Available in all BS and RAL colours
- Can be brushed or spray applied
- Easy clean....Wash and clean down with water

### AVAILABLE COLOURS:

Full range of BS4800 and RAL colours.

### PACK SIZE:

5 litre tins standard.

### COVERAGE:

Average approx 6 to 8 sq m per litre.

### WHERE TO USE

Playground Paint should be considered for the decoration of playground artefacts such as concrete shapes and figurines within the 'PLAY' environment.

When applying to wood, Playground Paint should be applied directly to the timber. Allow to dry and then apply a second coat.

### CLEANING:

Clean ALL tools, brushes and equipment with water.

### APPLICATION:

Whether used internally or externally, the surface must be clean, free of loose material free of grease and of sound construction. In the case of concrete loose chips should be removed and dusty or friable surfaces must be Sealed to achieve best results. The use of TEXI-BIND surfacer is recommended prior to applying Playground Paint to concrete shapes etc....

If sealing the surface, then allow to dry thoroughly prior to applying Playground Paint liberally. Apply a second coat for added durability in areas of above average or excessive activity. Available in gloss or satin.

### ADVISORY NOTE:

Always carry out trial/test area before commencing main job/contract. Always ensure suitability beforehand.
